- [Installation and Configuration](#)
- [Available Patch Releases](#)
- [Known Issues](#)

Introduction to the VMware vRealize Operations Management Pack for Site Recovery Manager 6.5.1

The VMware vRealize Operations Management Pack for Site Recovery Manager 6.5.1 allows VMware administrators to monitor the local Site Recovery Manager Windows services in VMware vRealize Operations Manager. The vRealize Operations Management Pack for Site Recovery Manager provides capabilities for monitoring the connectivity between Site Recovery Manager instances, the availability of a remote Site Recovery Manager instance and the status of Protection Groups and Recovery Plans in Site Recovery Manager. Alarms are generated when there are Site Recovery Manager Server connectivity issues encountered or Protection Groups and Recovery Plans are in error state. The user interface provides statistics for the number of SRM-related objects and how many of them have errors.

The vRealize Operations Management Pack for Site Recovery Manager 6.5.1 release runs with VMware vRealize Operations Manager 6.6 and is compatible with all Site Recovery Manager 6.5.1.x releases. For more information on interoperability with earlier or later releases of VMware vRealize Operations Manager, see the [VMware Product Interoperability Matrices](#).

You can download the vRealize Operations Management Pack for Site Recovery Manager 6.5.1 from the [download](#) page.

Installation and Configuration

The VMware vRealize Operations Management Pack for Site Recovery Manager 6.5.1 software requires VMware vRealize Operations Manager 6.6, and Site Recovery Manager 6.5.1.x. For information on installing VMware vRealize Operations Manager 6.6 see [Installing vRealize Operations Manager](#) in the vRealize Operations Manager documentation. For information on installing Site Recovery Manager 6.5.1.x, see

[Operations Manager](#) in the VMware vRealize Operations Manager documentation for information on installing Site Recovery Manager. SRM, see [Installing Site Recovery Manager](#) in the Site Recovery Manager documentation.

The VMware vRealize Operations Management Pack for Site Recovery Manager 6.5.1 software is distributed as PAK file. You install and configure the management pack by using the vRealize Operations Manager interface.

1. Log in to vRealize Operations Manager.
2. Select **Administration > Solutions** in the left pane.
3. Click the **Add** icon to start the wizard.
4. Navigate to the **VMware-srm-vrops-mp-6.5.1-<build number>.pak** file and click **Upload**. When the pak file is uploaded click **Next**.
5. Read and agree to the end-user license agreement. Click **Next** to install the management pack.
6. Review the installation progress, and click Finish when the installation completes.

After the installation you must configure the VMware vRealize Operations Management Pack for Site Recovery Manager 6.5.1 so that vRealize Operation Manager can collect data from the target system.

The minimum required user role to configure the SRM Adapter is a role with read (read-only) privileges for SRM objects.

1. Select **Administration > Solutions** in the left pane.
2. On the **Solutions** tab, select **Srm Adapter**, and click **Configure** on the toolbar.
3. Enter the required information in the Manage Solutions wizard and click **Save Settings**.

Note: To monitor more than one Site Recovery Manager instance at the same time using the VMware vRealize Operations Management Pack for Site Recovery Manager 6.5.1.x, you must deploy a separate vRealize Operations Manager appliance and Srm Adapter for each Site Recovery Manager instance.

Available Patch Releases

vRealize Operations Management Pack for Site Recovery Manager 6.5.1.1 Express Patch

Released 14 DEC 2017 | Build 7341776 | [Download](#)

The vRealize Operations Management Pack for Site Recovery Manager 6.5.1.1 Express Patch Release adds support for monitoring multiple Site Recovery Manager instances at the same time from a single vRealize Operations Manager appliance. The vRealize Operations Management Pack for Site Recovery Manager 6.5.1.1 is compatible with all Site Recovery Manager 6.5.1.x releases.

Known Issues

- **When a Protection Group or a Recovery Plan is removed, the associated alarms, if any, do not disappear**

When a Protection Group or a Recovery Plan is removed, the associated alarms, if any, do not disappear. The alarms are visible under **All alarms** in the UI. This does not affect the health of the Site Recovery Manager Site. It is calculated correctly.

Workaround: Delete the alarms manually.
