VMware Site Recovery Manager 8.3.1.4 Virtual Appliance | 07 DEC 2021 | Build 18834658 | Download

Check for additions and updates to these release notes.

VMware Site Recovery Manager 8.3.1.4 is a minor product patch release that provides bug fixes. The content of the VMware Site Recovery Manager 8.3.1 Release Notes, VMware Site Recovery Manager 8.3.1.1 Release Notes, and the VMware Site Recovery Manager 8.3.1.3 Release Notes applies to this version as well.

What's in the Release Notes

The release notes cover the following topics:

- What's New in Site Recovery Manager 8.3.1.4
- Installation and Upgrade
- Migration to Site Recovery Manager Virtual Appliance
- Resolved Issues

What's New in Site Recovery Manager 8.3.1.4

- The VMware Site Recovery Manager 8.3.1.4 Express Patch provides bug fixes.

Installation and Upgrade

If you are running Site Recovery Manager 8.3.1.x, upgrade to Site Recovery Manager 8.3.1.4. See Upgrading Site Recovery Manager in *Site Recovery Manager 8.3 Installation and Configuration* for instructions about upgrading Site Recovery Manager.

If you use vSphere Replication with Site Recovery Manager 8.3.1.x, upgrade the vSphere Replication appliance to version 8.3.1.4. See the vSphere Replication 8.3.1.4 Release Notes for information about vSphere Replication 8.3.1.4.

Note: An upgrade from Site Recovery Manager 8.3.1.4 to version 8.4.0.4 is not supported. You can upgrade Site Recovery Manager 8.3.1.4 to Site Recovery Manager 8.5.0.2.

Migration to Site Recovery Manager Virtual Appliance

You can migrate your Site Recovery Manager 8.3.1.4 instance from Windows to the Site Recovery Manager Virtual Appliance. For information about the migration procedure, see Migrate from Site Recovery Manager for Windows to Site Recovery Manager Virtual Appliance.

Resolved Issues

- **Test recovery fails with errors**

  When you use Site Recovery Manager to perform a test recovery, the test recovery fails. The Site Recovery Manager log contains the following errors:

  ```
  Failed to get tags for MoRef 'vim.VirtualMachine:vm-xxx'

  VM 'xxx' is not replicated by vSphere Replication
  ```

  This issue is fixed in VMware Site Recovery Manager 8.3.1.4.

- **The Edit Recovery Plan wizard shows a maximum of 20 Protection Groups**

  When you attempt to edit a Recovery Plan that contains more than 20 Protection Groups, the Edit Recovery Plan wizard shows only a single page with a maximum of 20 Protection Groups.

  This issue is fixed in VMware Site Recovery Manager 8.3.1.4.

- **Generation of vSphere Replication Replications report might fail**

  If you delete the source virtual machine from the vCenter Server inventory before you stop the active replication, the generation of vSphere Replication Replications report (export to CVS) might fail. When a source virtual machine of an active vSphere Replication vSphere Replication removes the outgoing replication on the source site and retains the incoming replication on the tar
