

VMware User Environment Manager Release Notes 9.2.2

Updated on: 12 MAR 2019

VMware User Environment Manager | 12 MAR 2019 | Build 9.2.2.864

What's in the Release Notes

The release notes cover the following topics:

- [About VMware User Environment Manager](#)
- [Updated Components](#)
- [Prior Releases](#)
- [Documentation](#)
- [What's New](#)
- [Important Fixes](#)
- [Other Notes](#)
- [Migration](#)

About VMware User Environment Manager

VMware User Environment Manager offers personalization and dynamic policy configuration across any virtual, physical, and cloud-based environment. User Environment Manager can simplify end-user profile management with a single and scalable solution. IT can simply map infrastructure (including networks and printer mappings) and dynamically set policies for end users. You can experience quick, personalized, and consistent access to your Windows workspace and applications.

For more information, see the product page: [VMware User Environment Manager](#).

Updated Components

This release updates the main product components, VMware UEM FlexEngine and VMware UEM Management Console. Application Profiler, Helpdesk Support Tool, and SyncTool are not updated for the 9.2.2 release. If you are upgrading from version 9.2.1 or 9.2, you only need to upgrade the main product. If you are upgrading from a previous version, upgrade all product components.

Prior Releases

Features and known issues from prior releases of VMware User Environment Manager are described in the release notes for each release. Unless stated in the release notes, features and known issues from one release are carried forward to the next release.

Documentation

Documentation for User Environment Manager is located on docs.vmware.com.

What's New

User Environment Manager 9.2.2 fixes a security issue. See the [Important Fixes](#) section.

Important Fixes

This release of VMware User Environment Manager addresses a security issue where malicious local users could under certain circumstances execute code with elevated permissions.

Other Notes

- **Secured Approach.** User Environment Manager provides a secured by default approach by logging the users out in case the Flex config files path is not available at logon.

Migration

If you migrate from VMware Persona Management to VMware User Environment Manager, see <http://kb.vmware.com/kb/2118056> for the required migration steps.
