Using the Support Matrix and Interoperability Matrices

1

You can determine which versions of which products are compatible with one another by using the vRealize Automation support matrix and the VMware product interoperability matrices.

vRealize Automation Support Matrix

You can discover which versions of supported external applications are available for vRealize Automation 6.2.5 and all vRealize Automation 7.x versions by using the vRealize Automation Support Matrix. See [vRealize Automation Support Matrix](#).

VMware Product Interoperability Matrices

You can discover which versions of supported VMware products work with one another by using the VMware Product Interoperability Matrices. See [VMware Product Interoperability Matrices](#).
