

# vRealize Business for Cloud 7.2.1 Release Notes

vRealize Business for Cloud | 02 March 2017 | Build 5101870

Last updated: 04 May 2017

Check for additions and updates to these release notes.

## What's in the Release Notes

The release notes cover the following topics:

- [What's New](#)
- [Documentation](#)
- [Resolved Issues](#)
- [Known Issues](#)

## What's New

- **Tighter integration with vRealize Operations Manager.** If you have registered vRealize Business for Cloud with VMware Identity Manager, you can access vRealize Business for Cloud 7.2.1 on the vRealize Operations Manager. vRealize Business for Cloud appears as a tab named as **Business Management** in the vRealize Operations Manager 6.5 user interface.  
**Note:** If you have registered vRealize Business for Cloud with vRealize Automation, you cannot see the vRealize Business for Cloud user interface on vRealize Operations Manager.
- **Compatible with latest versions of VMware solutions.** vRealize Business for Cloud 7.2.1 is compatible with the latest versions of vRealize Operations Manager, vRealize Automation, VMware Identity Manager and vCenter Server. To see the list of all supported versions, see the [VMware Product Interoperability Matrix](#).
- **Upgraded JRE to 1.8 update 121.** JRE has been upgraded from 1.8.0\_102 to 1.8.0\_121 in this release.
- **Reduction in the vRealize Business for Cloud OVA file size.** The size of the OVA file that you use for vRealize Business for Cloud deployment is reduced from 3.5 GB to 1.8 GB.
- **Renamed Cloud Business Analysis Report.** The Cloud Business Analysis report that was introduced in vRealize Business for Cloud 7.2 has been renamed to Hybrid Cloud Assessment. A new summary page is added to the Hybrid Cloud Assessment report, which provides:
  - the current monthly cost and average VM cost of your private cloud
  - the total cost of ownership and the allocated cost that represents the percentage of private cloud utilization
  - the estimated monthly cost of public cloud (AWS and Azure)
  - the reclaimable opportunities with cost savings on private cloud
- **Additional access to vRealize Suite Standard license key.** If you log in to vRealize Business for Cloud by using the vRealize Suite Standard license key, you can see additional details such as:
  - The reclaimable virtual machines information on the Overview page.

- The datacenter optimization information under the Planning section.
- The cost savings opportunity information in the Hybrid Cloud Assessment report.

## Documentation

- [VMware vRealize Business for Cloud Installation and Administration Guide](#)
- [VMware vRealize Business for Cloud User's Guide](#)
- [VMware vRealize Business for Cloud Troubleshooting Guide](#)

## Resolved Issues

The following issues have been resolved in this release of vRealize Business for Cloud.

- [User Interface Issues](#)
- [Report Issues](#)

### User Interface Issues

- **You could not add more than 20 items for Additional Costs under Expenses**  
After you add 20 rows under **Expenses > Additional Costs**, the scroll bar disappears and you cannot add more items.

### Reports Issues

- **You could not download the Cloud Business Analysis report**  
When you click **Download PDF Report** to download the Cloud Business Analysis report, the PDF file is not downloaded. You see the following error in the `itfm-server.log` file.  
`Failed to execute task voa NumberFormatException`
- **You see multiple entries for a virtual machine on a single day in the Daily Price Report**  
When you have historic data, you see duplicate entries in the Daily Price Report for a virtual machine in a single day.

## Known Issues

The following issues are known to occur in vRealize Business for Cloud 7.2.1, and are grouped as follows:

- [Integration Issues](#)
- [Configuring and Provisioning Issues](#)
- [Report Issues](#)
- [Known Issues From the Earlier Releases](#)

### Integration Issues

- **The upfront cost for Azure blueprint is not supported**  
When you attempt to view the cost details for Azure blueprint on the vRealize Automation UI, you see the following error:  
`Cannot calculate cost. Contact your system administrator to review the vRealize Automation appliance logs.`
- **The `monit` command shows incorrect status about data collectors.**  
Though the data collectors are running, the `monit` summary command might show incorrect status stating that the service is not running.

**Workaround:** The issue occurs when the `PID` file for data collectors is missing in the `/usr/local/tcserver/vfabric-tc-server-standard/itbm-data-collector/logs` directory. To fix the issue, restart the vRealize Business for Cloud virtual appliance.

## Configuring and Provisioning Issues

- **Incorrect endpoint name is displayed for vCloud Director provisioned virtual machines in the vRealize Automation Virtual Machine report**  
vRealize Automation Virtual Machine report displays vCloud Air as the endpoint for the virtual machines provisioned in vCloud Director through vRealize Automation 6.2.5.
- **Incorrect count of network service policy is displayed after deletion of a policy.**  
After you delete a network policy from the Edit Pricing page, the count is not reduced under the **Pricing > Other Private Cloud Services** section.

## Report Issues

- **You see blank entries in the Daily Price report.**  
When you generate the Daily Price report, you see the price for the virtual machines till the previous day only. The price of the virtual machines for current day is blank.

## Known Issues From Earlier Releases

In addition to these new issues found in this release, some known issues from the earlier releases are also applicable. Click [here](#).
