What's in the Release Notes

These release notes cover the following topics:

- [What's New](#)
- [Installation and Configuration](#)
- [Resolved Issues](#)

What's New

The VMware vRealize Operations Management Pack for vSphere Replication 8.2.1.2 provides support for vRealize Operations Manager 8.3.

Installation and Configuration

The VMware vRealize Operations Management Pack for vSphere Replication 8.2.1.2 software is distributed as PAK file. You install and configure the management pack by using the vRealize Operations Manager interface.

- Log in to vRealize Operations Manager.
- Select **Administration** > **Solutions** > **Repository** in the left pane.
- Click **Add a Management Pack**.
- Navigate to the `vrAdapterPak-8.2.1.x.pak` file and click **Upload**. When the PAK file is uploaded, click **Next**.
- Read and agree to the end-user license agreement. Click **Next** to install the management pack.
- Review the installation progress, and click **Finish** when the installation completes.

After the installation completes you must configure the VMware vRealize Operations Management Pack for vSphere Replication 8.2 so that vRealize Operation Manager can collect data from the target system. The minimum role required to collect data is the **VRM replication viewer**. For more information on roles and permissions, see [vSphere Replication Roles and Permissions](#).

- Select **Administration** > **Solutions** > **Configuration** in the left pane.
- On the **Configuration** tab, select **VR Adapter**, and click **Configure** on the toolbar below.
- Enter the required information in the Manage Solutions wizard and click **Save Settings**.

Resolved Issues

- NEW** An error occurs, when you try to pair the vSphere Replication Adapter with vRealize Operations

If you are running vRealize Operations 8.1 and you try to pair the vSphere Replication adapter with vRealize Operations, the process fails with the following error:

`Server certificate chain is not trusted and thumbprint verification is not configured`

The issue is resolved in the vRealize Operations Management Pack for vSphere Replication 8.2.1.2.
