VMware vSphere Replication 8.4.0.2 | 15 JUN 2021 | Build 18008605 | [Download](#)

VMware vRealize Operations Management Pack for VMware vSphere Replication 8.4.0.2 is a minor product patch release. The content of the [VMware vRealize Operations Management Pack for VMware vSphere Replication 8.4 Release Notes](#) applies to this version as well.

Check frequently for additions and updates to these release notes.

## What's in the Release Notes

These release notes cover the following topics:

- [What's New](#)
- [Installation and Configuration](#)
- [Resolved Issues](#)
- [Known Issues](#)

## What's New

The VMware vRealize Operations Management Pack for vSphere Replication 8.4.0.2 provides support for vRealize Operations Cloud.

## Installation and Configuration

The VMware vRealize Operations Management Pack for vSphere Replication 8.4.0.2 software is distributed as PAK file. You install and configure the management pack by using the vRealize Operations Manager interface.

- Log in to vRealize Operations Manager.
- Select **Administration** > **Solutions** > **Repository** in the left pane.
- Click **Add a Management Pack**.
- Navigate to the `vrAdapterPak-8.4.0.x.pak` file and click **Upload**. When the PAK file is uploaded, click **Next**.
- Read and agree to the end-user license agreement. Click **Next** to install the management pack.
- Review the installation progress, and click **Finish** when the installation completes.

After the installation completes you must configure the VMware vRealize Operations Management Pack for vSphere Replication 8.4 so that vRealize Operation Manager can collect data from the target system. The minimum role required to collect data is the **VRM replication viewer**. For more information on roles and permissions, see [vSphere Replication Roles and Permissions](#).

- Select **Administration** > **Solutions** > **Configuration** in the left pane.
- On the **Configuration** tab, select **VR Adapter**, and click **Configure** on the toolbar below.
- Enter the required information in the Manage Solutions wizard and click **Save Settings**.

## Resolved Issues

- NEW** You cannot add the vSphere Replication Adapter in vRealize Operations

When you try to add the vSphere Replication adapter in vRealize Operations, the process fails with the following error:

```
com.vmware.vim.vmomi.core.exception.CertificateValidationException: Server certificate chain is not trusted and thumbprint verification is not configured
```

This issue is resolved in vRealize Operations Management Pack for vSphere Replication 8.4.0.2.

## Known Issues

- You cannot configure the vSphere Replication adapter

Cannot verify login credentials. The authentication service infrastructure is not responding

This error might occur due to the case-sensitive vCenter Server credentials.

Workaround: Verify that your vCenter Server credentials are correct. You can check the lowercase and uppercase letters, for example administrator@vsphere.local instead of Administrator@vsphere.local.
