

VMware vSphere Replication 8.4.0.5 Release Notes

 Updated on 04/07/2022

VMware vSphere Replication 8.4.0.5 | 07 APR 2022 | Build 19564127 | [Download](#)

Check for additions and updates to these release notes.

VMware vSphere Replication 8.4.0.5 is a minor product patch release that provides important security fixes. The content of the [VMware vSphere Replication 8.4 Release Notes](#) applies to this version as well.

What's in the Release Notes

These release notes cover the following topics:

- [What's New](#)
- [Installation and Upgrade](#)
- [Resolved Issues](#)

What's New

- The vSphere Replication 8.4.0.5 Express Patch provides bug fixes.

Installation and Upgrade

For the supported upgrade paths for vSphere Replication, select **Upgrade Path** and **VMware vSphere Replication** in the [VMware Product Interoperability Matrices](#).

You use the ISO file and the VRMS Appliance Management Interface to upgrade from vSphere Replication 8.2.x or 8.3.x to vSphere Replication 8.4.0.x.

If you are running vSphere Replication 8.4, upgrade to vSphere Replication 8.4.0.5. See [Upgrading vSphere Replication](#) in the *VMware vSphere Replication Administration 8.4* for instructions about upgrading vSphere Replication.

If you use vSphere Replication with Site Recovery Manager 8.4.0.x, upgrade the vSphere Replication appliance to version 8.4.0.5. See the [Site Recovery Manager 8.4.0.5 Release Notes](#) for information about Site Recovery Manager 8.4.0.5.

Note: If you are upgrading from vSphere Replication 8.2.x or 8.3.x, you must configure a password for the admin account. See Step 12 of the procedure in [Upgrade vSphere Replication Appliance](#).

Resolved Issues

- **NEW** You are unable to upgrade from vSphere Replication 8.3.1.5 to vSphere Replication 8.4.x

When you attempt to upgrade vSphere Replication 8.3.1.5 to vSphere Replication 8.4.x, the upgrade fails. The updatecli.log shows the following error: `package libopenssl1_0_1-1.0.2v-1.vmw.photon.16312154.x86_64 does not verify: no digest`.

This issue is resolved in vSphere Replication 8.4.0.5.

- **NEW** After upgrading vCenter Server, you might observe error messages in the Site Recovery UI

When you open the Site Recovery UI after upgrading your vCenter Server to version 6.7 Update 3p, you might observe the following error message: `User is not logged in. Terminating method execution due to lack of privileges`. The same error is observed in the dr.log and the HMS logs.

This issue is resolved in vSphere Replication 8.4.0.5.
